For Immediate Release

ESCO Corporation Expands into Western Australia

New Kalgoorlie location will provide direct support for area mining and construction customers

Perth, Australia—[ESCO Corporation](#) (USA), a leading global provider of wear parts and attachments for the mining and construction industries, continues to increase its presence in Australia with the establishment of a new sales and service location in Kalgoorlie, Western Australia.

“Establishing the ESCO Kalgoorlie branch is an important step in the company’s efforts to directly serve customers throughout Australia,” said Jeff Kershaw, Managing Director for the Asia Pacific region. “Supported by our global supply chain, the new location will offer a full range of superior ESCO products and an expanded service offering in the area.”

When fully operational on March 1, 2011, ESCO Kalgoorlie will serve as base for local sales and service personnel, and will immediately offer a complete range of crusher wear manganese products, bi-metallic wear buttons and blocks, and the Ultralok[®] Tooth System. Additional products, including a full line of ESCO Ground Engaging Tools, buckets and wear parts, will become available following expiration of ESCO’s license agreement with Bradken on June 30, 2011.

“Demand for resources continues to rise throughout Australia, including around Kalgoorlie. Our expanded presence in this area will allow us the opportunity to better serve this growing customer base,” said Steve Lennard, Director of Sales for Australia.
